

# Bonding Covalently

1. goal is for all to have 8 valence  $e^-$  except for Hydrogen want 2 valence  $e^-$
2. the center atom is the atom who needs the most  
(Hydrogen nor a Halogen can be in the center)  
(group 17)
3. put it together like a puzzle

ex. 1  
PCl<sub>3</sub>

ex 2
